

TECHSOFT Receives \$14 Million Contract From Space and Naval Warfare Systems Center Charleston

Pensacola, Florida - Space and Naval Warfare Systems Center (SPAWAR) Charleston has awarded TECHSOFT a \$14 million contract for support in the oversight and management of technical network operations, applications research and transference of new technologies.

“This is another fantastic win for TECHSOFT,” said company President Tom Pigoski. “We have had a very successful working relationship with SPAWAR Systems Center Charleston for several years, and our work there is expanding. This contract provides the vehicle to fuel that expansion.”

Under the five-year contract, TECHSOFT will serve as prime contractor to SPAWAR Charleston’s Code 70 Chief Engineer, which supports a variety of communications and Information Warfare programs that either directly support or relate to the overall effectiveness of U.S. Navy and other government entities to maintain strategic and tactical dominance.

TECHSOFT will offer support in a variety of technical areas, including Systems Engineering, Security Engineering, Software Engineering, Testing and Evaluation Engineering, Training and Course Development, and Process Engineering.

Headquartered in Pensacola, Fl., Technical Software Services, Inc. (TECHSOFT) is principally engaged in process engineering, software services, network services, information security, training/course development, and managed services. TECHSOFT has a 16-year record of delivering superior service and solutions to its clients, including federal agencies, state and local government, and commercial clients throughout the continental United States.
