

TECHSOFT Providing Process Improvement Support for Centurum

Pensacola, Florida – TECHSOFT has been awarded a contract with Centurum Information Technology in Charleston, S.C. to provide consulting support on implementing process improvement with the goal of attaining Capability Maturity Model Index (CMMI®) Maturity Level 2.

A leading provider of IT solutions to the military and federal government, Centurum provides vital IT and engineering services as well as powerful software tools that help clients better manage and leverage their information assets. Achievement of CMMI® Level 2 will assist them in improving the consistency and predictability their development activities.

Under the terms of the Centurum contract, TECHSOFT will:

- Develop and review CMMI®-compliant processes, documents, templates, and Standard Operating Procedures.
- Provide training on SEI/CMMI accepted procedures.
- Conduct the Standard CMMI® Appraisal Method for Process Improvement (SCAMPI) Class C, B, and A appraisals to benchmark the progress toward the attainment of overall Maturity Level 2 for the company.

TECHSOFT is a licensed Software Engineering Institute Partner (SEI Partner) with SEI-certified instructors and appraisers, who teach and conduct CMMI® appraisals for government and commercial organizations throughout the United States.
