

## **TECHSOFT Teams with SAIC on Web-Based Training Development**

*Pensacola, Florida* – TECHSOFT was recently awarded a sub-contract with Science Applications International Corporation (SAIC) to develop web-based training (WBT) modules for the Center for Information Dominance (CID) at Corry Station in Pensacola, Florida.

The project includes support of courseware development for the Tactical Information Warfare Officer (TIWO) and Information Operations Coordinator Course (IOCC) courses of instruction at the CID.

The TIWO and IOCC courses are new development initiatives in response to emerging training requirements for junior and senior officers supporting Information Operations in fleet billets of the U.S. Navy.

The first course development effort - for TIWO - includes 74 WBT modules that TECHSOFT will develop to be embedded into the overall course of instruction as e-learning events. The second effort, for IOCC, has yet to be determined.
